Education

UCLA (University of California Los Angeles)

Los Angeles, California

B.S. IN COMPUTER SCIENCE AND ENGINEERING

Sept. 2013 - Dec. 2017 (Expected)

- GPA: 3.8 / 4.0

Experience

Connoisseur (Startup)

Los Angeles, California

FULL STACK ENGINEER

Apr. 2017 - Jun. 2017

- Built an iOS application using the React Native framework which provides restaurant suggestions based on a Netflix-like recommendation algorithm
- Overhauled the front-end interface to provide a robust visual design and improve usability and functionality
- Migrated from Node.js to a Java Spring Boot back-end infrastructure, resulting in fewer and more efficient API calls

Illumio

Sunnyvale, California

SOFTWARE ENGINEERING INTERN, PRODUCTION ENGINEERING TEAM

Jun. 2016 - Sept. 2016

- Completely designed and implemented MODOK, a system for creating, scheduling, monitoring, and analyzing Gatling load tests using Ruby on Rails.
- Provided SAML authentication integrated with the company's OneLogin service, ensuring secure access
- Created a Google Chrome extension which tracked JIRA story points and allowed developers to "level up" during a company hackathon

Intel

Hillsboro, Oregon

SOFTWARE ENGINEERING INTERN, NETWORKING PLATFORM LAB

Jun. 2015 - Oct. 2015

- Contributed to the development of core components of a 4G LTE cellular network using C++
- Identified and optimized a bottleneck that involved flushing to standard out, resulting in an application speedup of 200% (confirmed with the UNIX time utility)
- Utilized Python and Django to quickly collect and analyze gigabytes of server data logs and display the statistics on a web server.

Skills

Programming (Proficient)	Java, Javascript, Python, Ruby
Programming (Familiar)	Bash, C, C++11, Scala
Libraries/Platforms	AWS, Django, JUnit, Rails, React Native
Markup/Templating	HTML, CSS, Latex, Markdown
Data/Databases	SQL, ETL, Amazon S3, Amazon RDS

Projects

Expedia Big Data Analysis

PYTHON, PANDAS, NUMPY, JAVASCRIPT, D3.JS

- Analyzed a large (multiple TB) Expedia dataset using Python and used the results to develop a marketing strategy to improve customer conversion
- Developed a visualization to demonstrate the data to a panel of judges using Javascript and D3
- Finalist project at DataFest 2017

Fractal Generator

C++, LIBPNG, OMP, MULTI-THREADING

- Built a multithreaded program which rendered images of Mandelbrot and Buddhabrot fractals using C++ and libpng
- Won a competition hosted by UCLA IEEE for being the best overall fractal generator
